

## English

The children will continue to build their understanding of sentence structure and develop a greater control in what they write. We shall explore stories, non fiction and poetry linked to the topics they will be learning about.

## Maths

This term the children will be getting to grips with 4 digit numbers. They will learn how to round them up and down to the nearest 10, 100 and 1000. Children will also continue to secure their understanding of formal methods of addition, subtraction and multiplication.

## Science-

The children will be learning about how all materials are made of matter and how matter can be in different forms. They will experience first hands and devise and carry out tests to explore how materials can change.

## History –

Children will discover life in Roman times and consider the impact the Romans had on England. We shall visit Exeter and the museum to discover first hand how the Romans helped for the city.

# Year 4 Autumn

**Art and Design and Technology**  
Children will be exploring the art of David McLeod and linking it to the microscopic photos of different materials. They will be designing, making and evaluating a catapult and exploring different states of matter in making food.

## PE Days

The children will have PE Thursday afternoons with the sport coaches and will learning how to play netball.

## Geography –

The children will learn about physical features and different land formations in the world and begin to understand how they were formed. We shall focus in on volcanoes and earthquakes this will help them apply their understanding of States of Matter and also link to lives of the Romans by looking at the fall of Pompeii.

## Forest School Afternoons

The children will begin Forest school on Monday 10<sup>th</sup> September until Half term. Please make sure they have appropriate clothes to stay warm and dry as we shall go what ever the weather.
